

GM-10 Garland Machine

The machine that you feed "holding the natural handle (stem)" of boughs instead of feeding stem first.

The Industry Standard
MGM10 ~ \$6450.00

PRODUCE QUALITY GARLAND:

- ~ Counts footage & coils the finished product
- ~ Makes evenly spaced garland
- ~ Uses substantially less labor & 26 ga. wire
- ~ 1/2 hp, with variable speed control
- ~ Smooth, quiet, reliable & easy to use

Other machines need heavier, costlier wrap wire.
The GM-10 starts paying for itself immediately through material and labor savings.
